

ENVIRONMENTAL ACTION CONFERENCE

JULY 13-15 2020

CHICAGO, IL
FIELD MUSEUM

TRAIN-THE-TRAINER

CONNECTING ENVIRONMENTAL EDUCATION AND CIVIC ACTION

\$375 Registration
Breakfast & Lunch
All Materials

Join Earth Force in this three-day workshop to learn our Community Action & Problem Solving Process, a powerful tool to facilitate and integrate student-led action into your environmental education. Over our three days together, participants will learn, model, and practice each step of the Process with emphasis on building youth-adult partnerships, encouraging critical thinking, accessing community resources, approaching stakeholders, and planning and celebrating action. We will also offer time to network, plan, and share ideas, as well as opportunities hear about the successes and challenges of student-led action from mentors who are currently implementing this Process.

ENVIRONMENTAL ACTION CONFERENCE

JULY 13-15 2020

CHICAGO, IL
FIELD MUSEUM

TRAIN-THE-TRAINER

We welcome all informal educators interested in improving their capacity to facilitate and integrate civic action into environmental education. In this three-day workshops participants can expect to:

- Learn how to implement and facilitate Earth Force's Community Action & Problem Solving Process to promote student-led civic action in various educational settings.
- Develop the skills necessary for facilitating professional development of student-led civic action.
- Build capacity to support educators in integrating student action projects into existing programming.
- Learn best practices to cultivate youth-adult partnerships while maintaining the ability to meet learning goals.
- Get familiar with resources to support action.
- Learn what's working and what's not from peers and mentors and develop your own plan of action.
- Receive a full year of direct Earth Force support.

Earth Force has 25 years of experience fostering the advancement of civic engagement in environmental education. After participating in the Earth Force Process, a majority of students report improved ability to identify environmental issues, compare solutions, talk to community experts, and determine necessary steps to change policies. 76% of students having participated in the Earth Force Process rate the experience as good to excellent.
