

Bringing Research to Life ...

eeRESEARCH

A Library of EE Research at Your Fingertips!

Every day, new and exciting research is published about environmental education and connecting people to nature. Unfortunately, many of these articles, which are full of insights about the field, are hidden behind a firewall and only available to those who have special access. But now, thanks to a generous grant from the Pisces Foundation and support from ee360, NAAEE and the Children & Nature Network have created eeRESEARCH¹—an exciting online library of more than 1,000 research summaries and syntheses, as well as a number of open-access articles.

Whether you're a program developer, evaluator, researcher, or funder, you can browse the combined research collections of both NAAEE and C&NN in one user-friendly platform. And for more detailed searches, you can use a variety of tools to narrow your search to the topics, authors, or focus areas that interest you. The goal in creating this library is to help everyone in the field find resources to support their work and to improve the link between research and practice.

As new studies are published, we will continue to add more articles, summaries, and syntheses to expand the library and provide access to the latest research. Stay tuned! Learn more about NAAEE's research initiatives on eePRO,² and head over to C&NN's website³ to check out their research efforts.

Help us make this library as useful as possible!

We encourage you to explore eeRESEARCH and let us know what you think. You'll see a button on every page that will let you report a problem or provide feedback. We'd love to hear from you!

Thank you to the Pisces Foundation and ee360 for their support of eeRESEARCH.
