

# The Whale Museum's Virtual Workshop: Species In The Spotlight

Southern Resident Killer Whale

Sacramento River Winter-Run Chinook Salmon

Central California Coast Coho Salmon

Hawaiian Monk Seal

Pacific Leatherback Sea Turtle

## February 10-12, 2021

*Get to know the species highlighted by NOAA that are most likely going to go extinct in the near future and what on-going recovery efforts, research, and education efforts are underway to prevent their extinction.*

Presentations will be given virtually (through Zoom) by NOAA researchers and managers on: Atlantic Salmon Gulf of Maine Distinct Population Segment (DPS), Central California Coast Coho Evolutionarily Significant Unit (ESU), Cook Inlet Beluga Whale (DPS), Hawaiian Monk Seal, Pacific Leatherback Sea Turtle, Sacramento River Winter-run Chinook (ESU), Southern Resident Killer Whale (DPS), White Abalone, and North Atlantic Right Whale. This workshop will begin on Wednesday, February 10, and will include 3 half-day sessions going from approximately 10:00 am to 2:00 pm (Pacific Time) each day. Zoom link(s) and agenda will be emailed to registrants closer to the start of the course.

Atlantic Salmon

Tuition: \$90 pp Member/\$115 pp Non-Member.
